

Dev Patel

Full-Stack Developer

buildwebproject@gmail.com · India · buildwebproject.com

Open to freelance & contract work — \$20/hour, remote

PROFESSIONAL SUMMARY

I'm Dev Patel — a full-stack software engineer with a genuine love for building things. Give me a language, any language, and I'll speak it: from pixel-perfect web apps to mobile apps and the backend systems running underneath, I build it all, end to end.

My current obsession: blending 3D, motion and clean engineering into experiences people actually remember. When I am not shipping, I am experimenting with WebGL, shaders and whatever is next.

CORE SKILLS

Languages	Dart, Kotlin, PHP, Python, Swift, TypeScript
Frameworks & CMS	Django, Flutter, Laravel, Next.js, Node.js, React, React Native, Sanity, Shopify, Silius, Symfony, Tailwind CSS, WooCommerce, WordPress
Databases	MySQL, PostgreSQL, SQLite
Tools & DevOps	Docker, Figma, Lighthouse, REST API, Razorpay, Search Console, Stripe
3D & Motion	Blender, GSAP, Three.js, WebGL

EXPERIENCE

Full-Stack Freelance Software Engineer — Upwork 2023 — Present

Working as an independent full-stack engineer on Upwork at \$20/hour — building websites, web apps, mobile apps and custom software for clients worldwide, in whatever language or stack the project needs.

Founder, CodingEx — YouTube 2020

Started a YouTube channel called CodingEx to teach Python and Django — the project that first got me hooked on building and explaining software.

KEY PROJECTS

Gutter Glow — WordPress 2022

Worked on several tasks for a gutter-cleaning service's WordPress website — service pages, quote requests and local SEO improvements. Built via Vivan Web Solution.

WordPress, PHP, MySQL

March Logistic — Laravel 2024

Fixed CSV import/export issues in a logistics management system handling shipment tracking, dispatch and reporting. Built via Vivan Web Solution.

Laravel, PHP, MySQL

Mobio Distribution — Silius 2023

Built from scratch on Symfony with the Silius e-commerce bundle — a full online store tailored to the client's requirements, including multiple custom plugins, custom theme integration, and a secure, properly configured Docker deployment on the server.

Symfony, Silius, PHP, MySQL, Docker

Saathi Ride — Flutter 2025

Ride-sharing app — real-time booking, driver matching and trip tracking for a ride-hailing service.

Flutter, Dart, REST API

CORE COMPETENCIES

Web Development · Mobile App Development · E-Commerce Development · SaaS & Custom Software · UI/UX & 3D Experiences · SEO & Performance · Maintenance & Support

EDUCATION

Master of Computer Application (MCA) 2021 — 2023

Ganpat University, Mehsana

Bachelor of Computer Application (BCA) 2018 — 2021

Ganpat University, Mehsana
